

Foreword

Articles 113 and 114, paras. 114.1, 114.3 and 114.4, of the Integrated Text of the Electricity Market Rules (hereafter “Electricity Market Rules”) provide that the invoicing period for transactions made in the Green Certificates Market (MCV), as well as the invoicing modalities and time limits shall be defined in the Technical Rules.

Article 115 of the Electricity Market Rules provides that the modalities and time limits for payments from debtor Market Participants to GME shall be defined in the Technical Rules.

Article 116 of the Electricity Market Rules provides that the modalities and time limits for payments from GME to creditor Market Participants shall be defined in the Technical Rules.

1. Invoicing period

The invoicing period for transactions made in the MCV is each market session.

2. Notifications and invoices to be received by GME

For each invoicing period, by the end of the working day following the close of the reference session, GME will provide each Market Participant that is in credit towards GME with a notification concerning the sale transactions made by the same Market Participant in the MCV. This notification will allow the Market Participant to issue an invoice to GME within the next second working day. To this end, GME will send an e-mail message to the Market Participant with an xml file, ready to be converted into the corresponding invoice. The invoice will have the layout shown in the next paragraph.

3. Layout of the xml file representing GME’s notification for issuing the invoice

4. Invoices issued by GME

For each invoicing period, by the end of the second working day following the close of the reference session, GME will send an invoice (by e-mail) to each Market Participant that is debit toward GME. The invoice will show the amounts of the purchase transactions that the Market Participant has made in the MCV. The invoice will have the layout shown in the next paragraph.

6. Offsetting of payables/receivables

If, within the same market session, the Market Participant concludes both purchase and sale transactions, the amounts of the related payables and receivables, including VAT, will be offset, provided that GME receives the Market Participant's invoice within the time limit referred to in para. 2. above.

7. Settlement of payments by Market Participants that are net debtors

Within the third working day following the close of the reference session (pursuant to Article 115 of the Electricity Market Rules), GME will satisfy its receivables from net debtor Market Participants by utilising their available deposit until reaching the amount of such receivables and refunding the possible surplus in accordance with the modalities and within the time limits established in Technical rule no. 02 MCV.

8. Settlement of payments to Market Participants that are net creditors

GME will make payments to each Market Participant that is net creditor towards GME on the third working day (value date on the same day) following the close of the reference session and after receiving the related invoice. The payment will be made with the "BIR - Bonifico di importo rilevante" bank transfer procedure. If the payment cannot be made with the BIR procedure (because banking rules do not permit the use of such procedure for the amount to be transferred), the payment may be made with the "Bonifico Urgente" urgent bank transfer procedure.

If GME does not receive the invoice within the time limit established in para. 4 above, the payment will be made by the end of the working day following the one of receipt of the invoice.

The time and date when the payments are debited on GME's account will be those recorded by the information system of the bank in charge of the Electricity Market treasury services.

9. Application of VAT

Green Certificates purchase/sale transactions with counterparties holding a VAT number in Italy will be liable to VAT at the ordinary rate of 20%.

In the case of sales made to Community foreign operators, no VAT will be applied if the purchaser is a taxable person in his/her country; VAT will be applied at the ordinary rate of 20% if the Community purchaser is not a taxable person in his/her country.

In the case of sales made to non-Community foreign operators, VAT will be applied at the ordinary rate of 20%.

Appendix: VAT codes

The following tables show the VAT codes used in XML files.

VAT CODES FOR MARKET PARTICIPANTS' PURCHASES	DESCRIPTION
V1	<ul style="list-style-type: none"> ▪ Domestic supply of goods to non-Community operators or Community operators not subject to VAT ▪ VAT rate applied = 20%
V4	<ul style="list-style-type: none"> ▪ Not liable to VAT as per Art. 7, para. 4, DPR 633/72 ▪ VAT rate applied = 0%

VAT CODES FOR MARKET PARTICIPANTS' SALES	DESCRIPTION
A1	<ul style="list-style-type: none"> ▪ Domestic supply of goods ▪ VAT rate applied = 20%
A6	<ul style="list-style-type: none"> ▪ Supply of goods not subject to VAT ▪ Reverse charge
