| Title | Unit of measurement and rounding |
| Reference standards | Article 5 of the Rules of the natural gas market |

Published on 30 September

1. Premise

Article 5 of the Rules provides that the unit of measurement is defined in the Technical Rules.

2. Unit of measurement and rounding

For the market purposes:

- the unit of measurement of the amount of gas is MWh/day, specified with three decimals;
- the unit of measurement of the currency is EUR, specified with two decimals;
- a) the unit of measurement of the unit prices of the gas is EUR/MWh, specified with three decimals

For the purposes of the market, all rounding is performed under the mathematical criterion.

In particular, figures are rounded up or down to the nearest last decimal allowed and, if the result is halfway, they are rounded up.
