INTRODUCTION

AIM OF THE DOCUMENT

PIP Application provides for the downloading and uploading of different information through various files in XML format; this document describes the transaction, in terms of formats, used within these files.

ENTRY FLOWS

Below please find the order to enter information:

1. Asset Power
2. UMM Power

1. Asset Gas
2. UMM Gas

1. Market Information

SCHEMES FORMAT

This Implementation Guide details the various XSDs for each section of the website, in addition to the types allowed for each XSD. In addition, there are the prototypes of XML for submission to Gatherer with the explanation of each item and the modes to fill it out

GasAssetManagement.XSD

```
<?xml version="1.0" encoding="iso-8859-1"?>
<xs:schema xmlns:tns="urn:XML-PIPE" elementFormDefault="qualified" targetNamespace="urn:XML-PIPE" xmlns:xs="http://www.w3.org/2001/XMLSchema">
